

BIOLOGIC ACCELERATOR FOR GRASS GROWTH
AND COMPOSTING PROCESSES

PRODUCT CODE :DCB005

Product Code	Microlife DCB005
Properties	Provides good quality compost from gardening wastes. When applied on soil accelerates grass growth, makes grass stronger and healthier.
Application areas	Compost production Acceleration of grass growth, providing healthier grass.
Mode of action	The microorganisms in DCB005 convert vegetal wastes and garden wastes to compost. When applied on soil DCB005 also accelerates the growth of grass. Helps plants to absorb fertilizers better and therefore helps to obtain the most efficient use of fertilizers.
Application	For compost production 300-500 gr of DCB005 per cbm of waste is applied. Prior to application the product is diluted in water and sprayed homogenously among layers of 20 cm. This application accelerates the composting process and decreases process costs. For grass growth application 2-4 kg of DCB005 is dosed per 100 sqm of area. A maintenance dose is applied once or twice a year as 1-2 kg. per 100 sqm.
Composition	Presentation : Mineral powder Granulometry : 160 micron – 1 mm Density : 1.0 - 1.2 Smell : None Color : Off white pH value in saturated solution : 6.5 - 7.5
Handling	25 kg. packs. Avoid from freezing and humidity Can be kept at 0 - 40 °C. dry room temperature when not exposed to direct sunlight for two years
Safety	Includes CLASS 1 microorganisms that do not require any special precautions during application, forwarding or storage. For further information please revert to material safety data sheet of the product.
